FOR INTEGRATORS AND EXPERIENCE DEVELOPERS

Professional Scent Generator **10 Scents**

The professional standard for scent delivery

Reference price €2,899 | Delivery in 1 week | 24/7 operation

Designed for 24/7 operation in museums, retail and simulators. The reference solution for AV integrators and experience developers building Virtual Reality (VR) projects, showrooms, sensory PODs, events, museums, escape rooms, cinema and immersive experiences in general.

ADVANTAGES FOR THE INTEGRATOR

- **Open architecture (UDP/DMX).** Total control from any PLC, PC or media server. Manage your scent narratives via our unified API.
- **24/7 operation.** High-durability components and a Quick-Swap cartridge system to minimize downtime in high-traffic fixed installations.
- **Pure scents (cold technology).** The technology does not heat the essences, avoiding chemical degradation. The dispersed aroma is 100% faithful to the original, fresh and unaltered.
- **Professional integration.** Open API (UDP) and native compatibility with control systems (Crestron, Q-SYS, AMX) and game engines (Unity, Unreal). Robust chassis and cold diffusion technology (no residue).

TECHNICAL SPECIFICATIONS

Capacity	10 scent cartridges (replaceable and customizable)
Coverage	Up to 25 m^2 (scalable via equipment array)
Dimensions	27 × 19 × 13 cm
Weight	2.5 kg
Connectivity	Ethernet + WiFi, DMX (Art-Net)
Power	110–240 V (industrial power supply included)
Mounting	Surface or rack (optional)

WHAT'S INCLUDED

- Full SDK and API documentation
- Technical support
- Olorama Smell Editor software, for scent customization

INTEGRATIONS

Control systems

Crestron | Q-SYS | AMX

Protocols

UDP API | DMX (Art-Net)

Media players and game engines

Zidoo | Unity | Unreal

COMPACT MULTICHANNEL SCENT DIFFUSION SYSTEM

AromaCore 6
6 scents

Professional multichannel scent diffusion · WiFi and Ethernet

Reference price €2,499 | Battery or wired | Silent, fanless

A compact 6-channel scent generator with smart control. WiFi and Ethernet connectivity, wireless battery operation and a design optimized for seamless integration into sensory experiences and professional environments.

DESCRIPTION

- **Precise, reliable, flexible.** AromaCore 6 is designed to deliver accurate control, reliability and maximum flexibility in professional applications.
- **6 independent channels.** Work with several fragrances in a single device to create dynamic scent experiences or controlled product tests.
- **Silent by design.** The fanless design keeps noise to an absolute minimum, without compromising system efficiency.
- **Install anywhere.** Its compact format (220 × 170 × 130 mm) and 100% wireless battery operation let you place it in any location, without complex power infrastructure.
- **Simple to integrate.** WiFi and Ethernet connectivity enable remote control, automation or synchronization with external systems.

TECHNICAL SPECIFICATIONS

Channels	6 independent fragrances
Dimensions	220 × 170 × 130 mm
Power	Wireless battery operation, or wired
Connectivity	WiFi and Ethernet
Operation	Silent (fanless design)
Maintenance	Low

APPLICATIONS

Sensory marketing | Fragrance testing and evaluation | Immersive experiences | Research and development | Interactive systems integration
